PROFESSIONAL SUMMARY

Operations and project coordination professional with hands-on experience supporting client onboarding, tracking tasks and deadlines, documenting repeatable workflows, maintaining CRM data, and coordinating follow-up actions across Notion, Airtable, HubSpot, Google Sheets, and automation tools. Skilled at turning multi-step processes into organized systems, monitoring workflow status, troubleshooting issues, maintaining accurate records, and supporting remote teams through structured communication and consistent execution.

CORE COMPETENCIES

Project Coordination: Task tracking, deadlines, status updates, dependencies, progress monitoring

Process Documentation: SOPs, checklists, workflow maps, handoff notes, project documentation

Workflow Support: n8n, Make.com, Zapier, Slack, Gmail, webhooks

Client Operations: Onboarding, follow-ups, record collection, communication, delivery coordination

CRM & Operations Tools: Notion, Airtable, HubSpot, Google Sheets, Google Forms

Quality & Reporting: Data validation, testing, dashboards, issue tracking, record accuracy

RELEVANT PROJECT EXPERIENCE

Selected self-directed portfolio projects demonstrating operations, coordination, CRM, and workflow support.

Client Onboarding Operations System | Make.com, Airtable, Notion, Gmail, Google Forms

- Coordinated an end-to-end onboarding workflow that converted approved client submissions into organized records, project information, assigned tasks, workspace content, and client communications.
- Mapped onboarding requirements, tracked process stages, applied filters and status updates, and documented workflow logic to support repeatable execution and troubleshooting.

Business Operations & Client Project Management System | Notion, Airtable

- Designed a centralized operating system for client information, projects, tasks, deadlines, priorities, documentation, meeting notes, and delivery activities.
- Created reusable client workspaces and documented project kickoff, onboarding, and delivery processes to improve progress visibility and consistent handoff.

HubSpot ClientFlow CRM | HubSpot, Workflows, Deals, Tasks, Reporting

- Configured workflows to update lead status, assign ownership, create deals and tasks, and schedule follow-ups based on pipeline stage and time delays.
- Resolved record-association issues and built dashboards for task visibility, pipeline monitoring, revenue forecasting, and follow-up tracking.

GrowAgency Lead Operations Pipeline | n8n, Airtable, Google Sheets, Slack, Gmail

- Built a structured lead-intake process that captured submissions, created accurate CRM records, and routed leads to the appropriate Slack and email follow-up actions.
- Tested field mapping, date formatting, status values, and exception cases; documented corrections to improve data accuracy and operational reliability.

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech), Agriculture: Ladoke Akintola University of Technology (LAUTECH) | 2010-2015

Full Stack Developer Training: Soft Quest | 2023-2024

Certifications: Airtable Builder Certification (2026) | Notion Essentials Badge (2026)
